

2023 SUPERMODIFIED DIVISION COMMITMENT CONTRACT

This is a contract involving the Oswego Speedway and the Supermodified owner for the 2023 racing season. The purpose of this contract is to reward the Supermodified owner with a weekly increase in the guaranteed minimum purse, while maintaining car counts, and improving the overall quality of the event.

The cost of this contract is \$100, payable by the Supermodified owner to the Oswego Speedway.

The Supermodified owner shall participate in all point races (feature events) in the 2023 racing season. The car will participate in at least one local promotional visit during the 2023 racing season. This contract stipulates that the Oswego Speedway increase the event payout to \$700 to any Supermodified commitment owner finishing below that payout. This contract is for the regular season only, Classic Weekend is excluded. The car must start the feature to receive the increased payout. If a commitment car is present but does not take the green flag at the start of the feature, the payout will be \$350.

Once qualifying is completed, 1 (one) non-qualified commitment car will be added to the feature event. The option is available to one commitment car per event, with the current season point standings having the first option. Each commitment owner has 1 (one) option to use for the 2023 regular season. This option is not available on Classic Weekend.

The 2023 commitment contract is offered first to the top 24 finishers in the 2022 final point standings - there may be additional openings if any of the top 24 opt out. There will be a total of 24 Supermodified commitment contracts offered for 2023.
